

IN THE CLAIMS

1. (Previously Presented) A method of finding WWW pages, each of which includes at least one list of links to desired Internet resources, comprising:

providing a list of URLs;

automatically generating at least one query for an Internet search tool for WWW pages that include links to at least one URL of said list of URLs;

executing said at least one generated query to provide search results that include at least one of said searched for WWW pages;

generating a response comprising at least one indication of one of said WWW pages, responsive to said search results;

wherein said response comprises a list of links listed in at least one of said WWW pages; and

wherein said list indicates pages not including a link to any URL in a predetermined list of URLs.

2. (Original) A method according to claim 1, comprising displaying said response to a user.

3. (Original) A method according to claim 1, wherein said at least one URL comprises a plurality of URLs.

4. (Original) A method according to claim 1, wherein said response is generated using a single search step and no iterations.

5. (Original) A method according to claim 1, comprising ranking said search results.

6. (Original) A method according to claim 5, wherein ranking of a WWW page is responsive to a number of groups of URLs pointed to by said WWW page.

7. (Original) A method according to claim 1, wherein said generating at least one search query, comprises:

dividing said list of URLs into a plurality of groups and generating at least a single query
